

MINI PROTEC BACKPACK

TECHNICAL CHARACTERISTICS

DIMENSIONS

HEIGHT:	40 CM
WIDTH :	40 CM
DEPTH:	23 CM
VOLUME:	55 LT
WEIGHT:	1.5 KG

Compact backpack for emergency situations. It is designed to reduce the spaces on the ambulances and emergency vehicles. It is equipped with 2 front pockets for basic devices. There is the chance to put inside the backpack velcro colored trousse to differ the devices. The 10mm hinges have high resistance and an hermetic closure. The hinge is resistant to the atmospheric agents and doesn't have any alterations in contact with water, oil and blood. The backpack can be carried through means of an handle at the top of the backpack. Also, there is a 2mm thick rubber covering the parts in contact with the ground, so that materials such as oils and blood are not absorbed and don't penetrate the backpack. The shoulder straps are designed ergonomically and are padded to offer the best comfort possible to the operator. In the inside the backpack is endowed with 2 wide spaces that can contain colored trousse to differ the devices. The backpack is customizable with logos and writings. It is produced in PL 600 material and also in Extreme. It is produced in Italy.
